CAREER OBJECTIVE

Artificial Intelligence student with hands-on experience in Machine Learning, Deep Learning, Computer Vision, Python Development,.

Skilled in building machine learning models, developing intelligent applications, and working with AI-powered tools. Experienced in developing academic and personal projects using Python and modern technologies.

Seeking opportunities to apply my skills in AI, Machine Learning, Deep Learning, Front_end Development, and Backend Development while contributing to innovative real-world solutions.

EDUCATION

Helwan International Technological University

College of Technology – **Artificial Intelligence**

Expected Graduation: **2028**

TECHNICAL SKILLS

Programming Languages: Python , HTML, CSS, Java, JavaScript, PHP, SQL

Machine Learning: Scikit-Learn, Pandas, NumPy , Data Collection , Data Preprocessing, Feature Engineering , Model Evaluation

Deep Learning: TensorFlow, Keras, Neural Networks, CNNs

Computer Vision : OpenCV, YOLO ,Image Processing , Object Detection

Backend Development: Python, Flask, REST APIs, Django, Node. js,

Web Development: HTML, CSS, JavaScript

UI/UX Design: Figma, Wireframing, Prototyping, User Research, User Flow, Responsive Design

Databases: MySQL, MongoDB

Tools: Git, GitHub, Jupyter Notebook, VS Code, Orange

Soft Skills: Communication, Teamwork, Problem Solving, Fast Learning

CERTIFICATIONS

- **AWS: Becoming a Machine Learning Engineer** – Manara (2026)
- Data Science: **Building Machine Learning Models** – HarvardX (Harvard University) (edX) (2026)
- **Computer Vision** – Kaggle (2025)

- **Introduction to Deep Learning with PyTorch** – DataCamp (2025)
- **Unsupervised Learning in Python** – DataCamp (2025)
- **Data Analytics Essentials** – Cisco Networking Academy (2025)
- **Data Science & Analytics** – HP LIFE (2025)
- **Python Programming Internship** – CodeAlpha (2025)

PROJECTS

Real-Time Shoplifting Detection System

Developed a real-time shoplifting detection system using YOLO11 and OpenCV.

Trained on 15,000+ surveillance images and achieved 0.90 mAP.

Technologies: Python, YOLO, OpenCV, Roboflow, Deep Learning.

project Link: [View Project](#)

Emotion Recognition from Speech

Built a deep learning model for emotion classification from speech signals.

Extracted MFCC features and trained neural network models using audio datasets.

Technologies: Python, TensorFlow, Deep Learning, Audio Processing.

project Link: [View Project](#)

Price Comparison Web Prototype

Developed a web prototype that compares product prices across multiple online marketplaces.

Collected and analyzed data using web scraping techniques.

Technologies: Python, Web Scraping, Data Analysis.

project Link: [View Project](#)

Disease Prediction from Medical Data

Built machine learning models to predict diseases using structured medical datasets.

Applied classification algorithms including Random Forest, SVM, and Logistic Regression.

Technologies: Python, Scikit-Learn, Machine Learning.

project Link: [View Project](#)

Harvard CS50 AI Projects

Completed 12 AI projects covering Search Algorithms, Knowledge Representation, Optimization, Machine Learning, Neural Networks, and Natural Language Processing.

Developed practical AI solutions using Python as part of Harvard's CS50 AI course.

Technologies: Python, Artificial Intelligence, Machine Learning.

project Link: [View Project](#)

Fraud Detection Dashboard (UI/UX Design)

Designed a modern dashboard prototype for monitoring and detecting suspicious financial transactions in real time.

Created user flows, wireframes, and high-fidelity interfaces using Figma with a focus on usability, accessibility, and data visualization.

Technologies: Figma, UI Design, UX Design, Prototyping, Dashboard Design.

Project Link: [View Project](#).
